All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to 02/13/06.
2. ☒ The allowed claim(s) is/are 1-6.
3. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

## DETAILED ACTION

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Frankeny on 03/07/06.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 drawn to method for testing the design of an integrated circuit, classified in class 716, subclass 6.
- II. Claims 7-8 drawn to test module for a production system IC, classified in class 716, subclass 6.

The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process and device for its practice. The inventions are distinct if it can be shown that either: (1) the method for testing as claimed can be use to make another different product, or, (2) the product as claimed can be make by another and materially different process. (MPEP § 806.05(e)). In the instant case the product as claimed can be made by another different process, such as one in which the method for testing the design of an integrated circuit system does not required applying signals and

power to inputs of the packaging module at packaging I/O pads corresponding to the sub-set of chip I/O pads.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with attorney Richard Frankeny on 03/07/06 an election was made without traverse to prosecute the invention of Group I, claims 1-6. Cancel claims 7-8.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

1. Claims 1-6 are allowed because the prior art does not teach or suggest a method for testing the design comprising the steps of: (a) desiring the system IC to have a predetermined number and pattern for its chip I/O pads; (b) designing a packaging module to fan-out the I/O of the system IC to an expanded pitch of packaging I/O pads having a correspondence to said chip I/O pads; (c) partitioning circuitry of said system IC into a functional circuit; (d) desiring said functional circuit as a corresponding test IC, wherein said test IC I/O pads conform to one of a sub-set of the number and pattern of said chip of an integrated circuit (system IC) I/O pads; (e) attaching said test IC to said packaging module with conductive material; f) exercising said test IC by applying signals and power to inputs of said packaging module at packaging I/O pads corresponding to said sub-set of chip I/O pads; and (g) collecting test data corresponding to said test IC

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

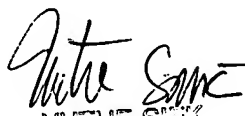

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binh C. Tat whose telephone number is 571 272-1908. The examiner can normally be reached on 7:30 - 4:00 (M-F).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Chiang can be reached on 571 272-7483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
